| Alternative names     |                                                                                                                                                                                                                                                                 |                 |               |
| Form                  | Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.                                                                                                                                                                                         |                 |               |
| Clonality             | Polyclonal                                                                                                                                                                                                                                                      |                 |               |
| Isotype               |                                                                                                                                                                                                                                                                 |                 |               |
| Conjugation           |                                                                                                                                                                                                                                                                 |                 |               |
| Background            | This gene encodes two proteins: sterol carrier protein X (SCPx) and sterol carrier protein 2 (SCP2), as a result of transcription initiation from 2 independently regulated promoters. The transcript initiated from the proximal promoter encodes the longer S |                 |               |
| Other                 | Gene_name: SCP2 ; Protein_name: NLTP; Expression:                                                                                                                                                                                                               |                 |               |
