| Background            | desmocollin 2(DSC2) Homo sapiens This gene encodes a member of the desmocollin protein subfamily. Desmocollins, along with desmogleins, are cadherin-like transmembrane glycoproteins that are major components of the desmosome. Desmosomes are cell-ce |                 |               |
